FULL STACK DEVELOPER

I am a passionate Backend Developer with a relentless curiosity for learning new technologies. Eager to explore and dive deeper into the ever-evolving landscape of backend development. Committed to continuous growth and excited about the challenges that come with pushing boundaries.

STRENGTHS AND EXPERTISE

- **Java, C, C++, Python**
- **Html, Css, JavaScript**
- **NodeJs ,Servlet, Jsp**

- **Linux, Shell Scripting**
- **Docker, Git, Jdbc**
- **Spring Boot**

- **Analytical Skill**
- **Communication Skill**
- **Time management**

PROFESSIONAL EXPERIENCE

- Present

Accomplishments:

- Developed a CRUD website with Java backend using JDBC, Servlets, and JSP integration.
- Created an interactive restaurant website using HTML, CSS, and JavaScript.
- Proficient in Git for project deployment on GitHub, employing relevant commands.
- Demonstrated expertise in Python, including the development of a random password-generating application.
- Solid understanding of Linux Unix-based operating systems with proficiency in shell scripting.
- Acquired knowledge in Dart language and Flutter for cross-platform application development.
- Familiarity with containers, specifically Docker, for diverse web application development.
- Actively served as a key member of the Euphoria student organization at LPU, organizing various events and acquiring valuable leadership and teamwork skills.
- Currently working on a project focused on user authentication and website login, utilizing Spring Boot, Java, and other technologies.

EDUCATION

Lovely Professional University
B.Tech(Computer Science Engineer)   **8.2 CGPA**
